

Xtream Player Install Guide

Putting the TV app on a Fire TV Stick.

There are **7 steps**. Each one has its own page and a picture.

You need the Fire TV remote and about 10 minutes.

PLEASE NOTE

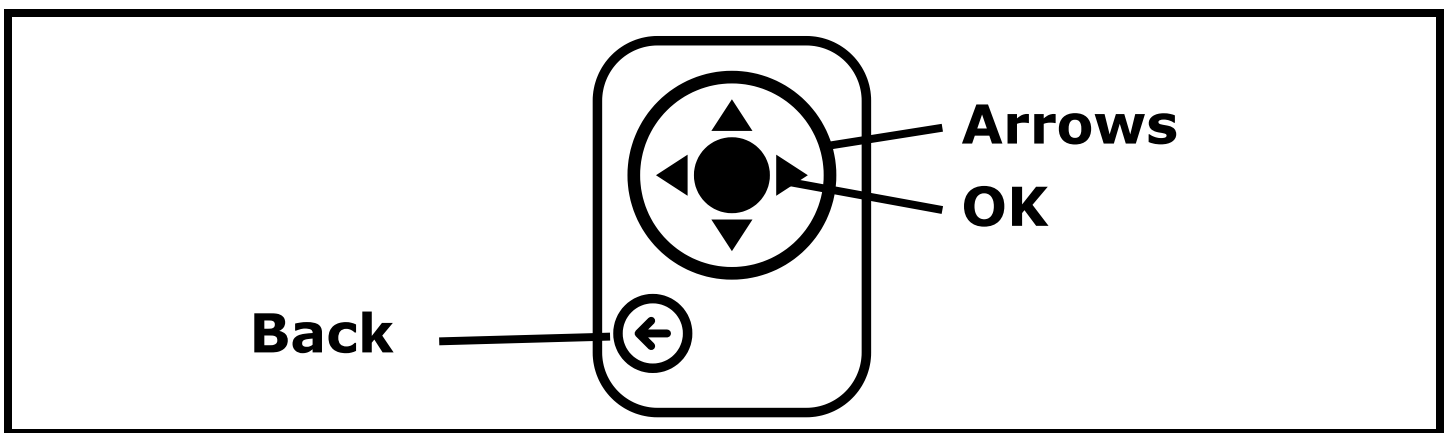

The pictures are **drawings**, not photos.
The real screen will look similar, not identical.

Your remote

Arrows move the highlight.

The **middle button** is OK. It chooses things.

Back is below and to the left.

Arrows move. Middle is OK.

1 Get Downloader

On the Fire TV, go to **Find**, then **Search**.

Type **Downloader** and choose **Get**.

Already have it? Go to Step 2.

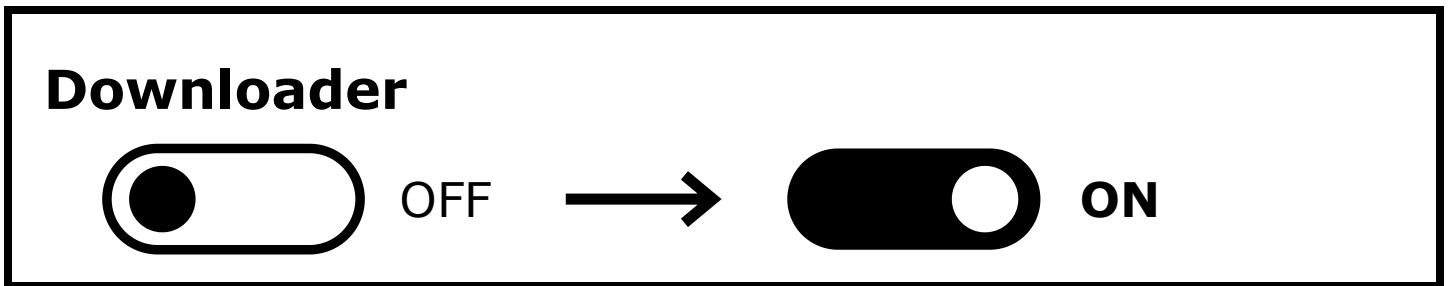

Search, then choose Get.

2 Allow installing

Without this, the install is refused.

Go to **Settings**, then:

1. My Fire TV
2. Developer options
3. Install unknown apps
4. Turn **Downloader** ON

Switch it to ON.

3 Type the address

Open **Downloader**. Press OK on the address box and type:

`ironmanseven7.github.io/IMS7Player`

No spaces. The dots and the slash matter.

`ironmanseven7.github.io/IMS7Player`

Go

Then choose Go.

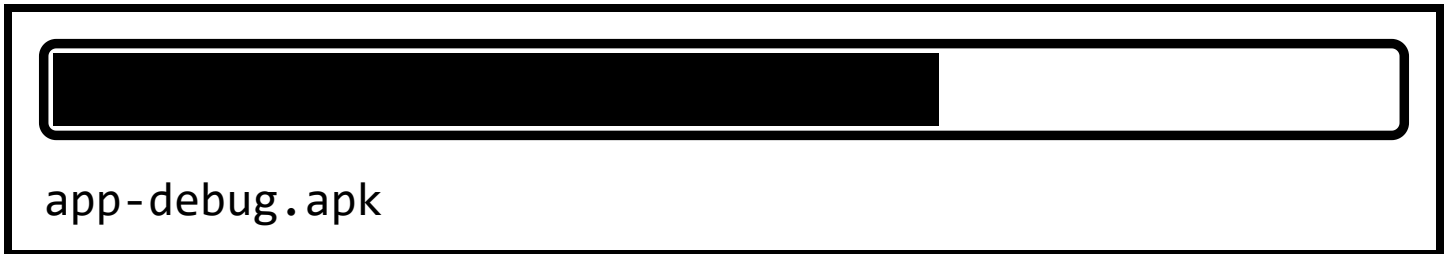

4 Let it download

A bar fills from left to right.

The file is small. It takes a few seconds.

IF A PAGE APPEARS

Move to the **Download the APK** button and press OK.

Downloading.

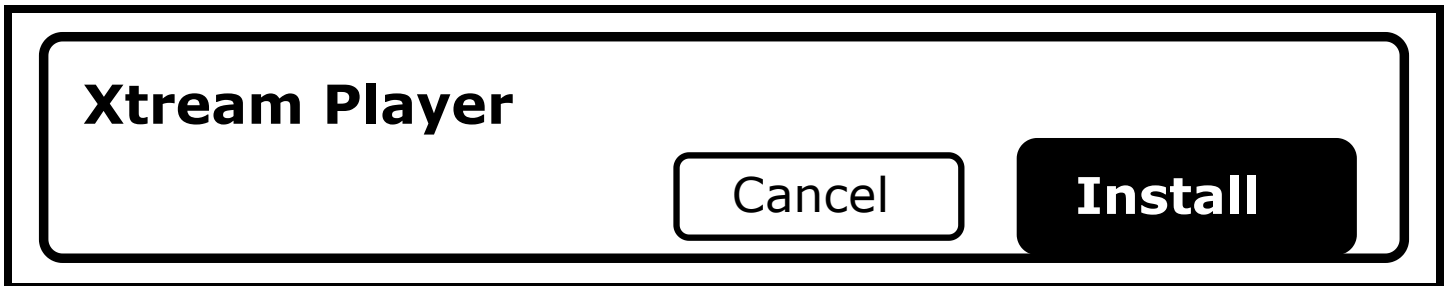

5 Choose Install

A box asks if you want to install it.

Move **right** to **Install** and press OK.

IF IT SAYS BLOCKED

Do Step 2 again. The permission is off.

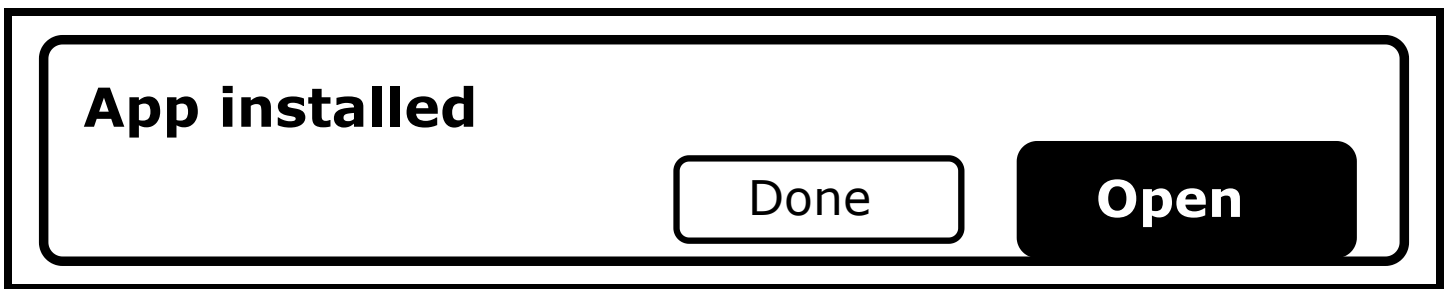

Install is on the right.

6 Open it

The box says **App installed**.

Choose **Open**.

Later, find **Xtream Player** with your other apps.

Choose Open.

Sign in

Type these three things, then choose **Connect**.

Server address

Username

Password

ASK CLAYTON

These are not printed here. Write them on the lines.

Using the app

The highlighted item has a **thick blue outline**.

Left and right move between the three columns.

Up and down move inside a column.

OK starts it. **Back** leaves full screen.

Groups, channels, picture.

Voice

There is a **Voice** button at the top of the app.

Choose it, then speak. For example:

- "watch CNN"
- "bring up movies"
- "pause"

The first time, the Fire TV asks to use the microphone. Choose **Allow**, then press Voice again.

If it goes wrong

"App not installed"

Do Step 2 again.

Page not found

Check the address for typing mistakes.

No picture

Choose **Diagnostics** at the top and read it out.

Picture keeps stopping

Set **Buffering** to **Smooth**.

Thank you

Thank you for testing this.

Anything confusing or hard to read is worth saying.

That is exactly what is useful to hear.
